GEO VAASTU COURSE

Geopathic stress is a distorted or disrupted electromagnetic field of the Earth.

The Earth resonates with an electromagnetic frequency of approximately 7.83 Hz – Schumann resonances (SR), which falls within the range of (alpha) human brainwaves. Underground streams, sewers, water pipes, electricity, tunnels and underground railways, mineral formations and geological faults distort the natural resonance of the Earth thus creating geopathic stress (GS). Sleeping or spending a lot of time in geopathic stress zones can ill effects on our health, performance and wellbeing.

“Geopathic Stress” and other kinds of electromagnetic pollution cause illnesses ranging from fatigue, depression, and sleep problems to diabetes and cancer, etc.,
